

Customer Account Status and Tier Service Levels

1. Account Activation Requirements

A customer's account must be active to receive full service benefits. Accounts inactive for more than ninety days will be automatically deactivated until reactivation is requested.

2. Tier Classification Criteria

Customers are classified into VIP, Premium, and Standard tiers based on policy history and account longevity. VIP status requires a minimum of five years insured and no more than one claim in the past three years.

3. Tier-Specific Service Goals

VIP clients receive a guaranteed response within four hours and priority claims processing. Premium clients receive responses within eight hours. Standard clients receive service within twenty-four hours.

4. Tier Review Period

Customer tiers are reviewed biannually to reflect changes in account status or claim activity. Adjustments to service level occur after review.

5. Account Closure Policies

Customers requesting account closure must provide thirty days' notice. Accounts with outstanding claims or balances cannot be closed until all matters are settled.

6. Data Accuracy Responsibilities

Customers must keep contact and personal information up to date. Inaccurate information may delay communications and claims processing.
