

Claims Submission and Processing Policy

1. Submission Deadlines

All insurance claims must be submitted within thirty days of the incident date. Claims submitted after this period will be subject to review and may be denied if submitted beyond ninety days. Timely submission ensures prompt processing and settlement.

2. Claim Evaluation Period

The company commits to evaluating all submitted claims within fifteen business days from the date of receipt. If further documentation is required, claimants will be notified within five business days.

3. Urgent Repair Claims

Claims related to urgent home repairs following severe weather events must be prioritized. Claimants must provide initial estimates within five business days of claim submission to prevent delays.

4. Documentation Requirements

All claims require comprehensive documentation including photographs, repair estimates, and police reports if applicable. Incomplete documentation may delay claim approval or result in denial.

5. High-Value Claim Thresholds

Claims exceeding \$10,000 require additional managerial review and approval before any payment disbursement. Documentation verification for such claims includes third-party appraisals or contractor bids.

6. Claim Rejection and Appeals

If a claim is rejected, claimants have thirty days from notification to submit an appeal. Appeals must include new or additional evidence not considered in the initial decision.
